

Base add-on water bag

Short Description

- Water weighted bag for freestanding sign holder poles
- Add on item for Green Magic's freestanding slot in poster stand ranges

Product Images

Description

Water bag for increased stability with floor sign holders

When free standing signs are to be used outdoors extra stability can be achieved using an add-on water-fillable base bag.

Shaped like a ring doughnut (donut) the flexible waterbag is simply placed over any of our [freestanding](#) bases before inserting the pole. When filled with water it will contribute significantly to the stability of the floor sign in windy outdoor conditions.

- Helps prevent [A4 and A3 floor signs](#) blowing over outdoors.
- 55cm diameter, adds 7kg weight to existing sign base.
- Suitable for Basic Base, Covered Base and Flat Base models of FreeStander. *Illustration shows the water-fill bag with a Basic Base.*

Additional Information

Accessory for Increased Stability of outdoor A4 and A3 sign stands

More Information

Addition of the water bag base improves the stability of freestanding signs in breezy situations to stop them blowing over in moderate wind. It suits A4 and A3 size models.

With the addition of a Donut water-bag the Basic Base and Composite Base weight is increased from 4kg to 11kg. With an A4 sign frame this should render the unit wind stable in fairly strong winds. With an A3 frame the sign stand will be stable in moderate winds.

Delivery and Returns

- We offer a choice of delivery options tailored to the goods selected and your location, calculated for you automatically in the Checkout. When feasible, you will be offered options for Free, Economy or Next Day delivery.
- Any product returned by the purchaser must be unused and in its original packaging, which should be unmarked. If goods are received damaged or faulty we will take care of the problem.
