

Black Bee-Line hook locks onto cable

Short Description

- Black Bee-Line hooks are intended for use with our black suspended cables
- Height adjustment is easy thanks to the finger tip push button to release the gripper mechanism
- The straight cable path means that a number of hooks can be threaded onto a single wire

Description

Versatile and economical adjustable suspension hooks

Black hooks have a matt black finish. The Bee-Line hook self locks onto wire and can be adjusted using the release button where the cable enters the fitting. The black hook has a safe working load of 17 kg with a 5:1 safety factor (advisable for suspended items). Height of hook is 37mm (1-1/2")

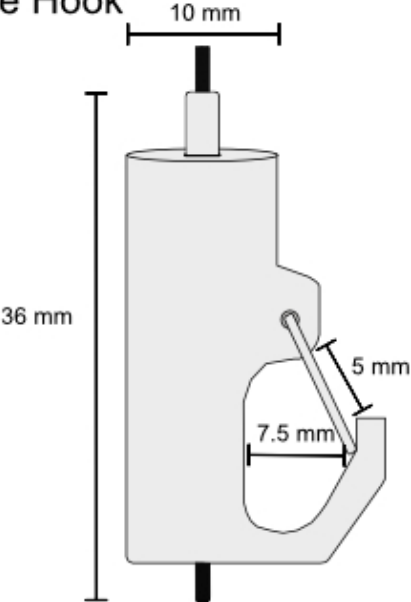

The cable passes straight through the hook. It can be cut off flush with the bottom or a short tail can be left for

further fine adjustment (recommended). Alternatively more hooks can be threaded onto a single cable – a useful feature for art retailers and picture framers where several different size pictures or paintings need to be displayed one above the other. The hook is so versatile and easy to use – resetting the height takes seconds.

We recommend these hooks are purchased with one of our black hanging wire sets or with other components from our range. On this page you can order with a black loop-end cable 2m long. This allows attachment to a small existing ceiling hook or can be used to create a lasso to suspend from a pole, pipe, trunking or roof purlin.

The hook works best on 7x7 1.5mm diam steel wire rope. It can be used with most wires between 1mm and 2mm thick but we recommend testing thoroughly if using your own wire, and our SWL ratings will not apply as they are based on laboratory tests using our own cables.

Additional Information

More Information	<ul style="list-style-type: none">• The Black Bee-Line Hook fitting itself is capable of holding up to 17kg.• The 1.5mm galvanised wire (7x7 construction) will carry these loads safely. However, some ceilings may not take such loads without reinforcement. If in doubt please consult a skilled tradesman or professional.
