Description

Hand sanitiser station delivering a professional solution

Beautifully designed hand sanitiser station is a professional quality gel dispenser suitable for public buildings, schools and universities, entrance foyers, shopping malls or any busy or prestigious location. Sanitising station is highly visible standing nearly 2 metres tall (192 cm) with a heavy duty floor stand. The lever operated hand sanitiser dispenser, poster frame and optional PPE dispenser (for disposable gloves or disinfectant wipes) each attach securely to the free standing stand and can be set independently at the optimum height.

Gel dispenser can be operated by elbow

The hand sanitiser station is a substantial sanitiser stand with lever action gel dispenser which can be operated by elbow, cuff or by hand. This stand projects a highly professional image and it won't get knocked over in a bustling location. The sanitising station is intended for indoor use but it could be used under an entrance canopy for instance.

The high quality dispenser is refillable with lever action which dispenses a measured amount of sanitiser gel. The drip catch tray can be pulled out for convenient cleaning.

Benefits of our floor standing hand sanitiser station

- Freestanding hand sanitiser dispenser, poster frame and optional PPE dispenser each attach securely to a substantial 1.9 m tall stand with sturdy base
- Hand sanitising station is suitable for high traffic areas
- A3 frame for your own sign or logo can be mounted either portrait or landscape
- Optional PPE dispenser accessory is included with the upgrade model. The box bracket is adjustable to accommodate different size PPE packs.
- Includes lever operated hand sanitiser gel dispenser with 1 litre capacity
(5 litre bulk supplies of alcohol hand sanitiser gel are available from us)
- Commercial hand sanitiser quality with stable 9 kg powder coated base
- Smart appearance and high quality manufacture with easy assembly (instructions supplied)
- Outstanding value hand sanitising station – looks good in any store, office, educational establishment or public space – indoors or even outside under a covered entrance or in a lobby.

More Information

Commercial grade sanitiser station

The sanitiser station is suitable for use in high traffic areas such as supermarkets, pharmacies, banks, factories, construction sites, residential buildings and many more locations.

The bottle supplied with the dispenser is easy to refill – it can be removed after releasing a spring loaded safety catch. However for rapid changeover in the middle of a busy day we suggest purchasing a reserve bottle which can be pre-filled and ready to exchange without delay. We supply spare [empty pump action bottles](#) which are compatible with the Hand Sanitiser Station.

Ordering in bulk?

Please refer to the quantity price breaks shown in the price grid. For quantities of 100 or more please ask us for a quotation.

Branded handed sanitiser station

There are various ways we can work with corporate clients, brand management agencies or commercial printers to deliver branded hand sanitisers based around this hand sanitiser station. Customised options are available starting from a minimum order quantity of 25 units for simple customisation – or for larger quantities if an increasingly bespoke product is required.

At its simplest the standard hand sanitiser station can be customised easily and at minimal cost by inserting a brand specific A3 poster into the top poster frame. For event management companies this makes it easy to change the look of the sanitiser stand for every client and each event. This can contribute to a really personalised, caring and welcoming entrance or delegate registration zone.

The manual lever action dispenser can be upgraded to an automatic dispenser at extra cost. As a standard off-the-shelf solution automatic dispensers are supplied with our slightly smaller and lighter-duty [automatic hand sanitiser dispenser floor stand](#).

Assembly and Installation

Easy to assemble, as shown in the video below (the pole is supplied in two halves). Assembly instructions are included.

Assembly instructions may be downloaded [here](#).
