Description

Automatic hand sanitiser dispenser with floor stand

Touch free sanitiser dispensers offer safe and convenient contactless hand sanitising. Our free standing automatic hand sanitiser dispenser offers a perfect solution for offices, schools, churches, shops, restaurants, care homes and many more. The dispenser floor stand provides a professional hand sanitising solution for staff, visitors, students or customers, avoiding risk of cross infection.

Poster frame enables you to tailor your message

This no touch hand sanitiser floor stand includes an A4 poster frame to let you easily customise your dispenser stand. The optimum message will depend on your intended users or audience and whether you want to include a logo or branding.

For example an automatic dispenser stand for schools can display an age-appropriate poster to appeal to children or young adults. In a factory or warehouse the message can be communicated with a familiar health and safety theme. Where branding is important such as in corporate offices or shops the 'please sanitise your hands' sign can reflect the house style and colour scheme of your business or organisation. A4 prints are generally produced in house using customers' own desktop printers - print-outs are easily inserted into the A4 frame (which is supplied without a poster).

Details of the automatic dispenser

The automatic dispenser unit uses advanced infrared sensing to detect the presence of hands and discharge the correct amount of gel. The reservoir inside the stylish white ABS casing is accessed using a supplied plastic 'key'. The dosing pump is powered by four AA size batteries (not supplied), which will normally last about a year (depending on use). The no touch sanitiser dispenser is intended for high frequency use such as in a school or commercial establishment. The gel capacity is approximately 1 litre. Gel is not supplied with the unit but can be ordered for delivery at the same time, saving a separate delivery charge.

Stable and attractive floor stand

The floor stand creates a good looking and practical free standing sanitiser dispenser. The sturdy leg is 155 cm tall providing plenty of room for the automatic dispenser and the poster frame, which can be fitted portrait or landscape. The dispenser height can be set at the required height e.g. set lower for use by children or wheel chair users.

The base is made of steel so it is stable, with rubber feet under each corner. It is coated with hard wearing silver paint to match the leg and the frame. The stand is suitable for use in most indoor environments, helping provide essential infection control.

What else do I need?

Gel, 4 x AA batteries and a header poster are not included.

Suitable Gel

Do not use very thin liquid alcohol which is intended for spraying, rather than dispensing via a gel pump. Liquid alcohol products are less viscous than gel and can easily run through the fingers causing drips and mess.

More Information

Size and Specification

- The height of the stand is 1,55m overall.
- The steel base is 350mm square and 4mm thick, weighing 4 kg
- The capacity of the dispenser is bottle 1000 ml. It should be filled using a funnel or jug with a spot to avoid spillage.
- The dispenser size is 25cm x 17cm x 12 cm

Product Dimensions

Assembly of the automatic hand sanitiser dispenser stand

Instructions are supplied. A small cross-head screwdriver is required together with 4 AA batteries for the automatic dispenser unit, plus sanitiser gel and an A4 poster or printed notice for the header frame.
