Easy peel backing sheet

## Description

---

### Small Adhesive Hanging Plate

Adhesive backed hanging plate with easy-release liner measures 40mm high by 80mm wide. The plate can be applied to almost any smooth and non flaky back panel to provide an easy way to hang a graphic from the wall.

The safe working load when in shear (on a vertical wall) is 1kg. Adhesive hanging plates are sold singly as an accessory for mounting our poster frames such as [black magnetic frames](#). Small hanging plates are suitable for

supporting A4 and A3 size. (There is a larger plate for bigger size frames).

## Avoid drilling the wall

1. To hang a frame on a picture hook, nail or picture pin we offer Adhesive Mounting Plates
2. A solvent wipe is provided with each mounting plate to prepare the mounting area on the back of the frame. Allow solvent to evaporate completely before applying the plate.
3. Adhesive Mounting Plates used singly should be stuck to the top centre of the frame backing sheet, positioned hard up against the underside of the frame top member.
4. Apply the plate with firm pressure at room temperature to allow a good bond to develop.
5. The frame can now be hung on the picture hook or nail.

## Additional Information
