### Black Lockable poster cases

Like our regular **silver cases** with a **black powder coated finish**. Durable paint process makes these lockable poster display cases suitable for use outdoors, as well as for internal poster displays.

- Hinged door display case for posters in smart black finish with tough clear polycarbonate glazing.
- The door is fitted with a lock and supplied with a pair of keys (additional keys are available).

- Posters are held in place with clear plastic clips around the perimeter of the frame - clips are hidden when the door is closed.
- The frame size is defined by the size of poster it will fit, from A4 and A3 up to A2 and A1. See more details.
- The frame is waterproof enabling outdoor use. The poster display case can be fitted portrait or landscape - in which case the supplied door stays help to hold the door open during poster changes.
- Poster display case is easily screwed to a wall or a backboard (fixings included).

More Information

**Black poster case is perfect for the display of a single poster**

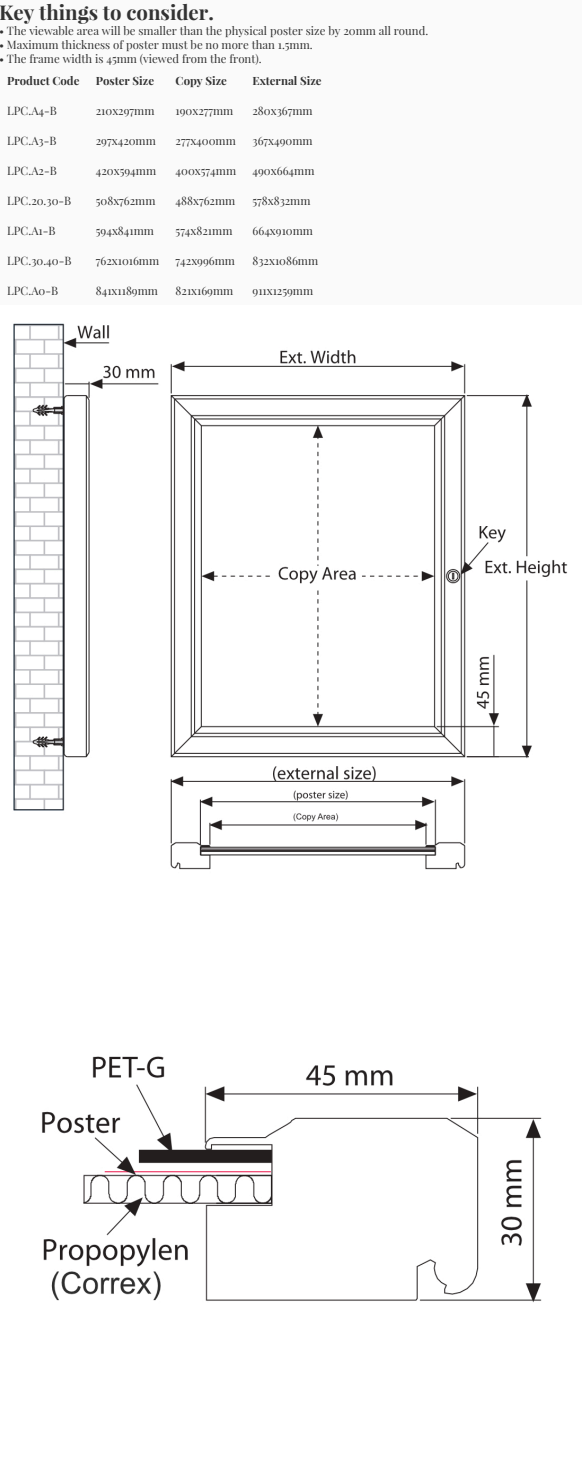

- Black poster cases are mainly intended to display a poster matched to the size of the case - the poster is secured by plastic clips concealed behind the rim of the door.
- As well as displaying posters printed on paper the display case will accept thicker card and other flexible substrates up to 1.5mm thick. If you wish to use a Poster Case as a notice board (e.g. for multiple A4 sheets rather than a single poster) the individual notices will need to be secured to the back panel by sticky dots or Blu Tack. There isn't sufficient space behind the door for pin heads and moreover the backing board is not designed to accept pins or thumb tacks.

**Condensation**

Condensation on the inside of the door can occur under certain atmospheric conditions. It is the same situation as inside a car windscreen where condensation can occur without implying that rain has actually entered.

Typically on a cold night after a humid day the water vapour in the air can condense on any cold surface (such as the glazed door or car windscreen) and this is unavoidable. In most situations any misting clears of its own accord as the glass (or clear plastic) warms up again.

Product Dimensions

Delivery and Returns

- We offer a choice of delivery options tailored to the goods selected and your location, calculated for you automatically in the Checkout. When feasible, you will be offered options for Free, Economy or Next Day delivery.
- Any product returned by the purchaser must be unused and in its original packaging, which should be unmarked. If goods are received damaged or faulty we will take care of the problem.
