Description

Special snap frame fittings

For use when snap frames are to be suspended or mounted onto slatwall panels.

- **Suspension clips** are metal fixings which slot under the top profile (at the back of the frame). These clips allow snap frames to be hung on picture hooks, picture pins, nails or screw heads left protruding out of the wall. They also enable snap frames to be hung on wire hooks – see our [hanging wire kits](#). Suspension Clips are sold as a pair (to hang one snap frame).
- **Slatwall fixing clips** combine the above clip with a clear plastic fitting which slots into slat walls. These enable snap frames to be mounted easily onto slat wall panels. Slatwall Clips are sold as a pair (to mount one snap frame).

Additional Information

More Information	<p>Note: These special fixings are ONLY required for special applications as described. All our snap frames are supplied with wall plugs and screws. We also offer another fixing method in the form of rolls of double sided adhesive tape.</p> <p>These special fixings cannot be used with Opti Frames or Waterproof snap frames as the suspension fitting cannot be inserted into the rear profile of these frames.</p>
