Chrome finish shiny polished silver snap frames

Chrome snap frames look great in any interior featuring shiny chrome decor e.g. hotel lobby, lift or elevator, corporate HQ, casino, Indian or Chinese restaurant etc. Chrome poster frames based on the snap frame concept are perfect for wall mounting. Posters can be loaded into the frame from the front and exchanged, if required, without even taking the frame down from the wall.

Special chrome effect achieved by chemical polishing gives these snap frames a shiny silver appearance almost indistinguishable from chrome plating.

- 25mm wide profile aluminium frame with chrome look.
- Front loading of posters and notices printed on A4 paper or other common sizes.
- Chrome snap frames are supplied complete with screws and wall plugs.
- Includes anti-reflective clear plastic protector sheet behind which you insert your poster.

More Information

- Chrome look frames are manufactured like regular snap frames with a realistic chrome finish applied.
- The metallic coating creates the impression that the poster frame is made from chrome plated steel.
- A bright polished finish creates the right look when other chrome fittings are specified.

Assembly and Installation

Fix Chrome frames using screws

- The usual way to permanently fix chrome look frames is with screws.
- Screws and plastic wall plugs are included with every snap frame we supply
- The wall plugs are for use with masonry walls such as brick and most plastered walls
- When screwing onto wood the plugs are not needed
- A drill and screwdriver are required for screw fixing (and we recommend using a spirit level and tape measure to ensure the steel-look frames are properly aligned). If in doubt please consult a proficient DIY or trades person.

Fix Chrome frames using adhesive tape

- Rolls of double-side adhesive tape are available as an accessory item.
- If **double-side adhesive tape** is used to fix frames (in place of the screws supplied) please check the smoothness and suitability of the wall.
- Tiles and similar surfaces may be suitable provided they are cleaned thoroughly before application.
- Tape fixing is not suitable for surfaces with a non-stick coating or porous/foamed surfaces.
- We recommend that tape is used around the full perimeter of the frame.
- Larger frames are normally best screwed. A residue of foam tape will be left on the wall or door after removal of the frame and the frame will usually be hard to get off.

Delivery and Returns

- We offer a choice of delivery options tailored to the goods selected and your location, calculated for you automatically in the Checkout. When feasible, you will be offered options for Free, Economy or Next Day delivery.
