### Product Images

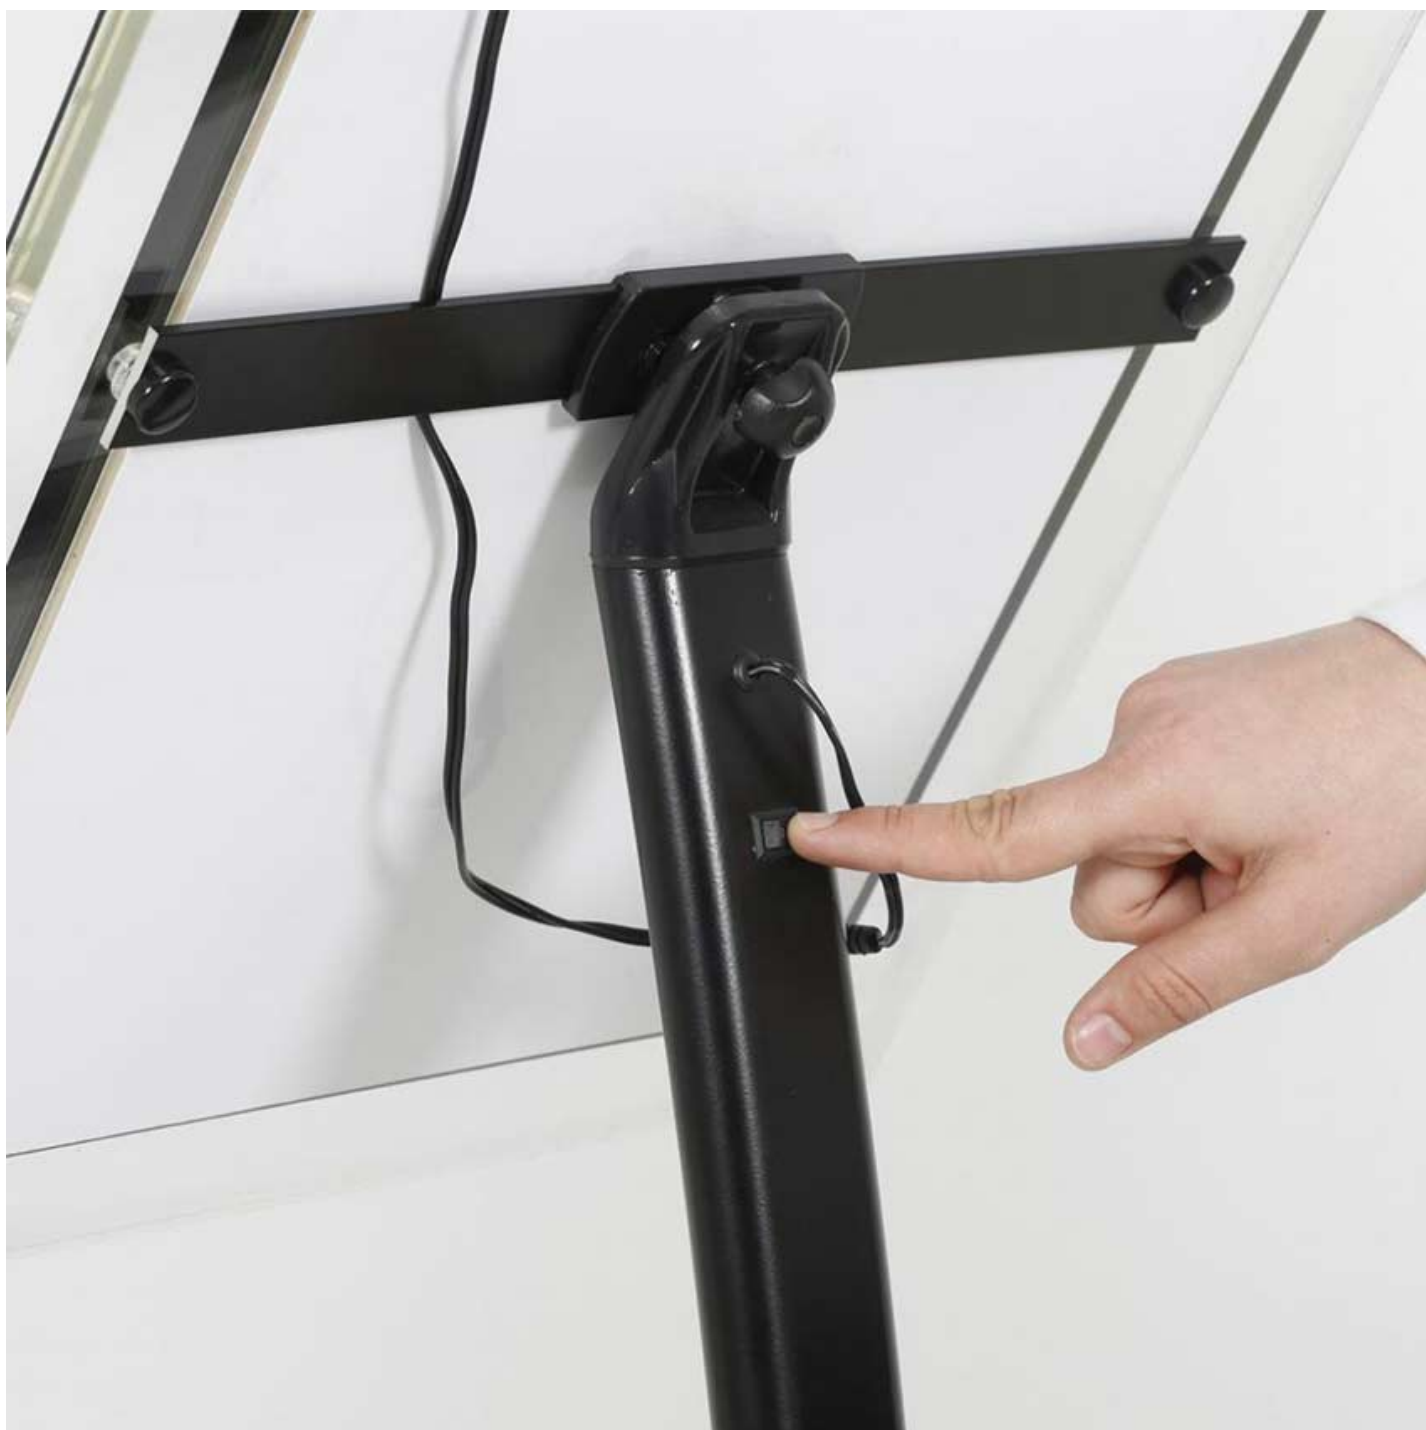

## Description

---

### Free standing illuminated menu stands

This illuminated menu stand brings a stylish and contemporary look to any environment from a high-end restaurant to an art gallery. The subtle acrylic poster frame with LED surround and curved black stand and base make these display stands perfect for menus, signs and posters. The LED-lit menu holder is easily adjustable for portrait or landscape presentation.

This elegant illuminated menu display will stand out from the crowd:

- The light-up poster frame has a subtle acrylic surround with the print area edged with a smart black border. When illuminated the rim of acrylic lights up creating an appealing and eye-catching look.
- Behind the acrylic frame, an LED-powered panel lights up your message to make it stand out both by day and especially at night. Best results are achieved when your print is on backlit film but it also works with most poster papers (not card).
- A special fitting behind the frame means it can be turned from portrait to landscape in moments - and locked securely in place.
- Lumi Curve is supplied in A4 or A3 size with a plug+transformer to connect to a regular 13 amp socket with the supplied lead. The electrics should not be exposed to rain or high humidity.

## **How to make an attractive entrance**

- Illuminated signs stand out in the evening, even for attracting attention inside a shop doorway after closing time.
- Free standing A4 menu display can be used as a restaurant menu display board or menu light box.
- A3 illuminated menu stand can serve as an unmanned Maitre D stand in a hotel or contemporary cafe.
- Estate agents and travel agents can use an illuminated floor-standing entrance sign to draw in customers.

## Additional Information

### More Information

### Assembly and Installation

#### Assembly of Lumi Curve

- Assembly of Lumi Curve (also known as AcryLED menu board) is straightforward.
- The base is attached to the curved leg with two socket head bolts – an allen key is supplied to tighten these from the underside of the base.
- The acrylic poster holder (supplied fully assembled with LED light source) attaches to the top end of the pole with a plastic handwheel – which also provides the means to adjust the acrylic frame from portrait to landscape. When the handwheel is tightened the frame becomes securely locked.
- The cable is connected with a simple push in connector.
- A separate transformer is supplied with a mains connection cable.

#### Lumi Curve poster change

To change your poster undo the four studs (one in each corner) and place your new menu under the top acrylic plate. Your transparency or print is held in place by four clear plastic spring clips provided under the top lens.

### Delivery and Returns

- We offer a choice of delivery options tailored to the goods selected and your location, calculated for you automatically in the Checkout. When feasible, you will be offered options for Free, Economy or Next Day delivery.
- Any product returned by the purchaser must be unused and in its original packaging, which should be unmarked. If goods are received damaged or faulty we will take care of the problem.
