### Pin & Spike style ticket holders - food grade

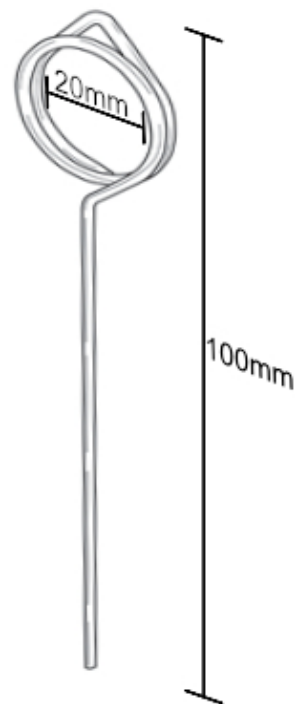

**Price ticket holders which can be stuck into displays are useful in food counters and other shop displays.**

**Butchers pins** are made from food-grade stainless steel. These stiff wire pins can be stuck in meat or cheese as they can be sterilised for reuse. The spring loop at the top will grip a plastic price card - for example, made from 500-micron plastic. The ticket will typically be the size of a credit card or up to double that size.

**The plastic spike card clip** has an adjustable angle head into which a plastic or card price ticket can be inserted as a push fit. As well as some food applications these stick-in price ticket holders can be used for pricing wool or perhaps stuck into Oasis in floristry displays.

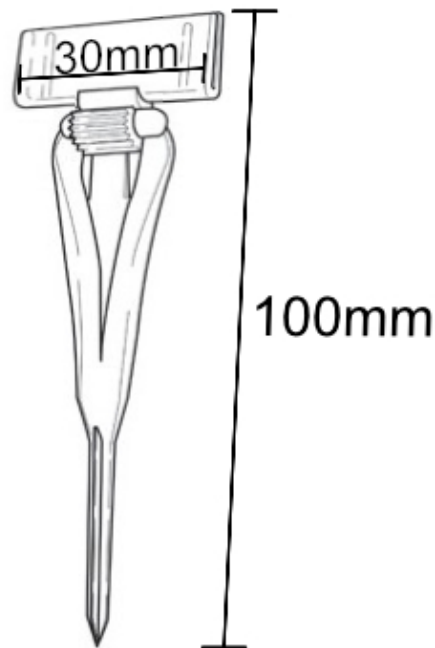

Both these stick in price ticket holders can be used with our 74x105mm (A7 size) plastic [chalk cards](#) using smudge-proof Posterman [waterproof chalk pens](#) (please click links to view and order these accessories).
